Description/Summary

An eye exam is not a covered medical benefit for common vision conditions, such as myopia, presbyopia, hyperopia, and astigmatism. An eye exam performed by an ophthalmologist or optometrist is a covered benefit when a specific ophthalmic disease, medical condition or infective process is being monitored or treated such as glaucoma, diabetic retinopathy, cataracts, macular degeneration, keratoconus, strabismus and amblyopia. Routine eye exams/care may be covered under the members benefit for vision services should the member have that benefit in their contract.

When a service may be considered medically necessary

Routine eye exams (CPT[®] Codes 92002-92014, 99202-99205, 99211-99215, 99241-99245) performed by an ophthalmologist or optometrist may be considered **medically necessary** under the medical benefit only when a disease condition of the eye is found or reasonably suspected in the setting of systemic disease, medication, injury, toxicity, infective process, or medical therapy with a significant chance of clinically significant ocular manifestations which, if not diagnosed, could potentially threaten either vision or the ocular health.

A screening test for defective vision in conjunction with a preventive medicine evaluation and management service when done in accordance with current American Academy of Pediatrics, American Academy of Family Practice, and/or Bright Futures guidelines by a qualified health care professional.

Contact lenses and eyeglasses are only eligible when the member has a vision materials rider or to treat aphakia and keratoconus. For aphakia and keratoconus, benefits for one set of eyeglasses or contact lenses for the original evaluation and one set for each new prescription. We also cover non-refractive therapeutic contact lenses.

Visual examination without refraction (CPT® Code 92002-92014) may be considered **medically necessary** under the medical benefit when a disease state of the eye or known to affect the eye is present or reasonably suspected or when an individual is undergoing long term treatment (greater than 30 days) with a high risk medication.

Visual examination with refraction (CPT® Code 92015) may be considered **medically necessary** under the medical benefit only in the treatment of aphakia and keratoconus.

Analysis of the retinal nerve fiber layer may be considered **medically necessary** under the medical benefit in the diagnosis and evaluation of patients with glaucoma. (Refer to Attachment IV for list of covered diagnoses).

Analysis of the optic nerve (retinal nerve fiber layer) (CPT® Code 92133) in the diagnosis and evaluation of patients with glaucoma or glaucoma suspects may be considered **medically necessary** under the medical benefit when using scanning laser ophthalmoscopy, scanning laser polarimetry, and/or optical coherence tomography.

Scanning computerized ophthalmic diagnostic imaging, posterior segment, unilateral or bilateral; retina (CPT® Code 92134) may be considered **medically necessary** under the medical benefit for testing for optic nerve pathology, and when the optic nerve may be affected by a separate pathology (eg: on-ocular primary malignancies, Posterior retina, Retinal Pigment Epithelium (RPE), choroid, etc.) Scanning computerized ophthalmic diagnostic imaging (SCODI) may be accomplished by various devices, among them Optical Coherence Tomography (OCT). When used in diagnosing and monitoring glaucoma, nerve fiber layer, and optic nerve conditions, OCT testing may be allowed every year. If the testing is done more frequently than every year, the testing may be subject to review for medical necessity.

Glaucoma Pressure Tests (CPT® Codes 92100, 92136) are only considered **medically necessary** under the medical benefit when a disease condition of the eye is found or reasonably suspected in the setting of systemic disease, medication, injury, toxicity, infective process, or medical therapy with a significant chance of clinically significant ocular manifestations which, if not diagnosed, could potentially threaten either vision or the ocular health.

Prescription glasses and contact lenses are covered only with (and subject to the limitations of) a vision materials rider except for Aphakia or Keratoconus.

Fundus photography (CPT® Code 92250) is **medical necessary** under the medical benefit when used to evaluate or monitor potential progression of a disease process.

Therapeutic keratotomy (CPT® Codes 66999, S0812) is **medically necessary** under the medical benefit as treatment of recurrent erosion of the cornea (ICD-10-CM H18.831, H18.832, H18.833, H18.839) and anterior corneal dystrophies (H18.59).

Corneal collagen cross-linking (CPT® Code 0402T) using riboflavin and ultraviolet type A is considered **medically necessary** under the medical benefit as a treatment of progressive keratoconus or corneal ectasia.

Computer-assisted corneal topography (CPT® Code 92025) is **medically necessary** under the medical benefit for ICD-10-CM (H18.601, H18.602, H18.603, H18.609, H18.611, H18.612, H18.613, H18.619, H18.621, H18.622, H18.623, H18.629).

Insertion of aqueous shunts or microstents for treatment of individuals with open-angle glaucoma may be considered **medically necessary** under the medical benefit when the following criteria are met:

- Insertion of ab externo aqueous shunts approved by the U.S. Food and Drug Administration as a method to reduce intraocular pressure in patients with glaucoma where medical therapy has failed to adequately control intraocular pressure; **OR**
- Insertion of ab interno aqueous stents approved by the Food and Drug Administration as a method to reduce intraocular pressure in patients with glaucoma where medical therapy has failed to adequately control intraocular pressure; **OR**
- Implantation of 1 or 2 Food and Drug Administration-approved ab interno stents in conjunction with cataract surgery for patients with mild-to-moderate open-angle glaucoma treated with ocular hypotensive medication.

Rigid gas permeable scleral lens, such as the Prosthetic replacement of the ocular surface ecosystem (PROSE HCPCS Codes: V2627, V2531), may be considered **medically necessary** under the medical benefit for patients who have not responded to topical medications or standard spectacle or contact lens fitting, for the following conditions:

- Corneal ectatic disorders (eg, keratoconus, keratoglobus, pellucid marginal degeneration, Terrien marginal degeneration, Fuchs' superficial marginal keratitis, postsurgical ectasia);
- Corneal scarring and/or vascularization;
- Irregular corneal astigmatism (eg, after keratoplasty or other corneal surgery);
- Ocular surface disease (eg, severe dry eye, persistent epithelial defects, neurotrophic keratopathy, exposure keratopathy, graft vs host disease, sequelae of Stevens Johnson syndrome, mucus membrane pemphigoid, postocular surface tumor excision, postglaucoma filtering surgery) with pain and/or decreased visual acuity.

When a service is considered not medically necessary

Non-computer-assisted corneal topography is considered part of the evaluation/and management services of general ophthalmological services (CPT® Codes 92002-92014) and reimbursement for Plan contracted providers is set accordingly. Separate reimbursement is not appropriate for this procedure.

Scanning computerized ophthalmic diagnostic imaging, posterior segment, unilateral or bilateral; retina (CPT® Code 92134) is considered **not medically necessary** when

performed solely as a screening method or for confirmation of glaucoma

A screening test for defective vision in conjunction with an evaluation and management service other than with a preventive medicine service done in accordance with current American Academy of Pediatrics, American Academy of Family Practice, and/or Bright Futures guidelines by a qualified health care professional, is considered inclusive to the office visit or preventive medicine service, and separate reimbursement is not authorized.

Use of a rigid gas permeable scleral lens for any other condition not listed above, is considered **not medically necessary**.

Separate reimbursement for the use of the femtosecond laser in laser-assisted cataract surgery with insertion of conventional intraocular lens is not appropriate and is considered **not medically necessary**.

When a service is considered non-covered because it is considered a benefit exclusion

Routine Eye Examinations

Routine eye exams are not a covered medical benefit for common vision conditions not accompanied by a specific ophthalmic disease, medical condition, injury, toxicity, or infective process which is being monitored or treated, such as myopia, presbyopia, hyperopia, and astigmatism, including for confirmation of defective vision identified on a covered screening examination. This does not apply when the member's contract specifies they have the vision care benefit. (Attachment I)

Vision training, orthoptic or plano training (non-prescription) including (CPT[®] Code 92065) is considered a benefit exclusion.

Corrective eye wear required by an employer as a condition of employment is considered a benefit exclusion.

Any determination of refractive state or any examination, prescription or fitting of eyeglasses or contact lenses is considered a benefit exclusion unless the refraction, examination, prescription or fitting is for the treatment of aphakia or keratoconus.

Refractive Keratoplasty is a generic term, which includes all surgical procedures on the cornea to improve vision by changing the refractive index of the corneal surface.

All Refractive keratoplasty procedures (CPT[®] Codes 65760, 65765, 65767, and 65771) are considered a benefit exclusion. Procedures include:

- Radial Keratotomy (RK)
- Photorefractive Keratectomy (PRK)
- Automated Lamellar Keratoplasty (ALK)
- Minimally Invasive Radial Keratotomy (mini-RK)
- Hexagonal Keratotomy
- Keratomileusis
- Keratophakia
- Epikeratophakia (lamellar Keratoplasty)

Correction of near or far-sighted conditions or aphakia (where the lens of the eye is missing either congenitally or accidentally or has been surgically removed, as with cataracts) by means of “laser Surgery.” This includes if the procedure involves the use of a femtosecond laser.

When a service is considered investigational

Retinal nerve fiber analysis (CPT® Codes 92133 and 99134) is considered **investigational** as a screening tool for glaucoma in individuals who are not at high risk for glaucoma and for all other diagnoses not listed in Attachment IV. Techniques used in the analysis of the retinal nerve fiber layer include:

- Scanning Laser Ophthalmoscopy (SLO)
- Scanning Laser Polarimetry, and
- Optical Coherence Tomography (OCT)

Optical coherence tomography (OCT) is a high-resolution method of imaging the ocular structures. OCT for the anterior eye segment is being evaluated as a rapid and non-invasive diagnostic and screening tool for the detection of angle closure glaucoma. Scanning computerized ophthalmic (e.g. OCT) imaging of the anterior eye segment (CPT® Code 92132) is considered **investigational for certain diagnoses codes** (Refer to Coding Table below.)

The measurement of ocular blood flow, pulsatile ocular blood flow, or blood flow velocity is considered **investigational** in the diagnosis and follow-up of patients with glaucoma

Premium or refractive intraocular lenses are considered investigational as long-term safety and efficacy is unproven and not medically necessary as standard lenses are available to provide normal vision. This includes (but is not exclusive to) accommodating toric, extended range, extended range toric, light adjustable, monofocal accommodating, monofocal toric, multifocal, multifocal toric, or phakic lenses.

Corneal collagen cross-linking using riboflavin and ultraviolet A is considered **investigational** for all other indications, except as treatment of progressive keratoconus or corneal ectasia as noted above.

Use of an ab externo aqueous shunt is **investigational** for all other conditions not listed above, including in patients with glaucoma when intraocular pressure is adequately controlled by medications.

Use of ab interno stents is **investigational** for all other conditions not listed above.

Document Precedence

Blue Cross and Blue Shield of Vermont (BCBSVT) Medical Policies are developed to provide clinical guidance and are based on research of current medical literature and review of common medical practices in the treatment and diagnosis of disease. The applicable group/individual contract and member certificate language, or employer's benefit plan if an ASO group, determines benefits that are in effect at the time of service. Since medical practices and knowledge are constantly evolving, BCBSVT reserves the right to review and revise its medical policies periodically. To the extent that there may be any conflict between medical policy and contract/employer benefit plan language, the member's contract/employer benefit plan language takes precedence.

Audit Information

BCBSVT reserves the right to conduct audits on any provider and/or facility to ensure compliance with the guidelines stated in the medical policy. If an audit identifies instances of non-compliance with this medical policy, BCBSVT reserves the right to recoup all non-compliant payments.

Administrative and Contractual Guidance

Benefit Determination Guidance

Prior approval may be required and benefits are subject to all terms, limitations and conditions of the subscriber contract.

Incomplete authorization requests may result in a delay of decision pending submission of missing information. To be considered complete, see policy guidelines above.

NEHP/ABNE members may have different benefits for services listed in this policy. To confirm benefits, please contact the customer service department at the member's health plan.

Federal Employee Program (FEP): Members may have different benefits that apply. For further information please contact FEP customer service or refer to the FEP Service Benefit Plan Brochure. It is important to verify the member's benefits prior to providing the service to determine if benefits are available or if there is a specific exclusion in the member's benefit.

Coverage varies according to the member's group or individual contract. Not all groups are required to follow the Vermont legislative mandates. Member Contract language takes precedence over medical policy when there is a conflict.

If the member receives benefits through an Administrative Services Only (ASO) group, benefits may vary or not apply. To verify benefit information, please refer to the member's employer benefit plan documents or contact the customer service department. Language in the employer benefit plan documents takes precedence over medical policy when there is a conflict.
