## Adjustable Cranial Orthoses for Positional Plagiocephaly and Craniosynostoses Corporate Medical Policy

File Name: Adjustable Cranial Orthoses for Positional Plagiocephaly and Craniosynostoses

File Code: 1.01.VT11

Origination: 11/2011

Last Review: 06/2023

Next Review: 06/2024

Effective Date: 07/01/2023

### Description

Cranial orthoses involve an adjustable helmet or band that progressively molds the shape of the infant cranium by applying corrective forces to prominences while leaving room for growth in the adjacent flattened areas. A cranial orthotic device may be used to treat postsurgical synostosis or positional plagiocephaly in pediatric individuals.

### Policy

#### Coding Information

Click the links below for attachments, coding tables & instructions.

[Attachment I- CPT® code table & instructions](#)

[Attachment II- ICD-10-CM codes](#)

#### When a service may be considered medically necessary

The use of an adjustable cranial orthosis may be considered **medically necessary** as part of the post-operative management of craniosynostosis.

The use of an adjustable cranial orthosis as a treatment of persistent plagiocephaly or brachycephaly without synostosis may be considered medically necessary when **ALL** of the following conditions have been met:

- The individual is at least 3 months of age but not greater than 18 months of age;  
**AND**

- Asymmetry has not been substantially improved following conservative therapy of at least 2 months duration with cranial repositioning therapy (with or without physical therapy). NOTE: Due to the mobility of individuals > 4 months of age, repositioning therapy is not effective and thus, a trial of repositioning is not indicated; **AND**
- Asymmetry of the cranial base as documented by **ANY** of the following:
  - *Cephalic Index* that is at least two standard deviations above or below the mean for the appropriate gender and age. The cephalic index, which describes a ratio of the maximum width to the head length expressed as a percentage, is used to assess abnormal head shapes without asymmetry. The maximum width is measured between the most lateral points of the head located in the parietal region (i.e., euryon). The head length is measured from the most prominent point in the median sagittal plane between the supraorbital ridges (i.e., glabella) to the most prominent posterior point of the occiput (i.e., the opisthocranium), expressed as a percentage. The cephalic index can then be compared to normative measures for age and gender. See Table 1 below; **OR**
  - *Skull Base Asymmetry*: At least 6mm right/left discrepancy measured subnasally to the tip of the tragus (cartilaginous projection of the auricle at the front of the ear); **OR**
  - *Cranial Vault Asymmetry*: At least an 8mm right/left discrepancy, measured from the frontozygomatic point (identified by palpation of the suture line above the upper outer corner of the orbit) to the contralateral euryon, defined as the most lateral point on the head located in the parietal region; **OR**
  - *Asymmetry of the orbitotragal distances*, as documented by at least a 4mm right/left asymmetry measured from the lateral aspect of orbit to tip of ipsilateral tragus.

The custom molded orthotic is designed to fit an individual's head for 2-4 months. A second helmet or band may be required if the asymmetry has not resolved or significantly improved after 2-4 months. A second helmet or band may be approved if criteria for the initial helmet were met as above.

Table 1: Cephalic Index

Gender	Age	-2SD	-1SD	Mean	+1SD	+2SD
Male	16 days to 6 months	63.7	68.7	73.7	78.7	83.7
Male	6 to 12 months	64.8	71.4	78	84.6	91.2
Female	16 days to 6 months	63.9	68.6	73.3	78	82.7
Female	6 to 12 months	69.5	74	78.5	83	87.5

### When a service is considered investigational

The use of an adjustable cranial orthosis is considered **investigational** for all other indications not outlined above.

### Document Precedence

Blue Cross and Blue Shield of Vermont (BCBSVT) Medical Policies are developed to provide clinical guidance and are based on research of current medical literature and review of common medical practices in the treatment and diagnosis of disease. The applicable group/individual contract and member certificate language, or employer's benefit plan if an ASO group, determines benefits that are in effect at the time of service. Since medical practices and knowledge are constantly evolving, BCBSVT reserves the right to review and revise its medical policies periodically. To the extent that there may be any conflict between medical policy and contract/employer benefit plan language, the member's contract/employer benefit plan language takes precedence.

### Audit Information

BCBSVT reserves the right to conduct audits on any provider and/or facility to ensure compliance with the guidelines stated in the medical policy. If an audit identifies instances of non-compliance with this medical policy, BCBSVT reserves the right to recoup all non-compliant payments.

## Administrative and Contractual Guidance

### Benefit Determination Guidance

Prior approval is required and benefits are subject to all terms, limitations and conditions of the subscriber contract.

Incomplete authorization requests may result in a delay of decision pending submission of missing information. To be considered complete, see policy guidelines above.

NEHP/ABNE members may have different benefits for services listed in this policy. To confirm benefits, please contact the customer service department at the member's health plan.

Federal Employee Program (FEP): Members may have different benefits that apply. For further information please contact FEP customer service or refer to the FEP Service Benefit Plan Brochure. It is important to verify the member's benefits prior to providing the service to determine if benefits are available or if there is a specific exclusion in the member's benefit.

Coverage varies according to the member's group or individual contract. Not all groups are required to follow the Vermont legislative mandates. Member Contract language takes precedence over medical policy when there is a conflict.

If the member receives benefits through an Administrative Services Only (ASO) group, benefits may vary or not apply. To verify benefit information, please refer to the member's employer benefit plan documents or contact the customer service department. Language in the employer benefit plan documents takes precedence over medical policy when there is a conflict.

#### Policy Implementation/Update information

11/2011	New policy. Coder reviewed and approved codes.
02/2014	ICD-10 remediation only. RLJ
08/2015	No language updates. No coding changes. RLG
06/2017	Minor grammar changes. Policy statement remains unchanged. Updated references.
09/2018	Reviewed and updated references no changes to policy statements.
08/2020	Policy statement changed to include medical necessity for brachycephaly without synostosis. Introduction and references simplified.
07/2021	Policy statement expanded to include cephalic index. References updated.
08/2022	Policy reviewed. Cephalic Index table added. Language added to second helmet/band component. Minor formatting changes. No change to policy statement.
06/2023	Policy reviewed. No change to policy statement. Minor language changes made for clarity and consistency. Reference updated.

## Eligible Providers

Qualified healthcare professionals practicing within the scope of their license(s).

## Approved by BCBSVT Medical Directors

Tom Weigel, MD, MBA  
Vice President and Chief Medical Officer

Tammaji P. Kulkarni, MD  
Senior Medical Director

### Attachment I HCPCS Codes and Instructions

Code Type	Number	Brief Description	Policy Instructions
<b>The following codes will be considered as medically necessary when applicable criteria have been met.</b>			
HCPCS	L0112	Cranial cervical orthosis, congenital torticollis type, with or without soft interface material, adjustable range of motion joint, custom fabricated	See prior approval list for instructions
HCPCS	L0113	Cranial cervical orthosis, torticollis type, with or without joint, with or without soft interface material, prefabricated, includes fitting and adjustment	See prior approval list for instructions
HCPCS	S1040	Cranial remolding orthosis, pediatric, rigid, with soft interface material, custom fabricated, includes fitting and adjustment(s)	See prior approval list for instructions

Attachment II  
ICD-10-CM Codes

Code Type	Number	Code Description
The following diagnosis codes will be considered as medically necessary when applicable criteria have been met.		
ICD-10-CM	Q67.3	Plagiocephaly
ICD-10-CM	Q75.0	Craniosynostosis
